CELEBRATING GUY BOUDIN

Various Publications

Enigmatic is one word often used to describe the late French photographer Guy Boudin. Most prominently know for his bold colour images, themselves enigmatic in their portrayal of female models, Boudin's style and aesthetic was also obvious in his black and white works.

Widely considered to have changed the face of fashion photography forever, French photographer Bourdin's innovative voice and visionary work is no longer seen solely in the context of commercial photography but is well esteemed in the annals of contemporary fine art.

We will be looking to create black and white imagery that has an apparent connection to his works - either by way of style, content or overall aesthetic.
